Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: Claims 1-91 are allowable over prior art references because related references do not disclose all the limitations of the claims, particularly, determining combining statistics comprising channel coefficient statistics, channel estimation error statistics, and noise statistics for RAKE fingers; and computing RAKE combining weights for combining the individual finger output signals from the RAKE fingers into a RAKE combined signal based on channel estimates from the input signals and the combining statistics.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bottomley et al. (U. S. Patent No. 6, 801, 565) discloses generating RAKE combining weights using noise statistics.
